Let's publish buyback program of \$50m or more. Send language and let's approve and place in Cointelegraph on Monday.

As of now, no one is buying in the market except for us

We spent \$20M in the last 36 hours (16M to buy out Intership and 4M to support in the market).

Tushar. The only thing you need from a technical standpoint to turn on earn in CEL for Americans is that rewards will be locked. Then we have a year to fix all other issues. When can they give you a patch to lock rewards for accredited Americans?

Launching this will create 3x more buying pressure on CEL

Ramping marketing to non US will do the same - when can we start campaigns outside the US?

That's the main hurdle. Locking the token. So we can build everything else except the backend work for that. The previous timeline was mid-Feb. I'm reorganization dev teams to do a mid-Jan launch - pushing, will be tough. It's primarily backend work. In the interim, we will start accepting accreditation verification from US users (not elegant in app) on Dec 23 with an ability to approve (or reject) within 48 hrs. Separately, getting a plan for the frontend team plus UX to pull up a couple of new product work up, so we can have a big launch in Jan. Will keep you posted.

We do have non-US campaigns running. Started ramping up last week.
